OPERATION AND EFFECTS OF THE GENERALIZED SYSTEM OF PREFERENCES

Scheme of the European Economic Community: 1992

Note by the UNCTAD Secretariat

1. The present document contains information published in various issues of the Official Journal of the European Communities, concerning the operation of the scheme of the EEC in 1992. 1/ It relates to the applications of Fixed Duty Free Amount (FDFA), Fixed Reduced Duty Amount (FRDA), community ceilings and/or quotas for individual beneficiaries. Subsequent information will be published as it becomes available.

2. During 1992, three sensitive agricultural products, namely "preserved pineapples in slices and other than in slices" and "flue-cured virginia tobacco type" were affected by the FRDA and MFN rates were re-established vis-à-vis all beneficiaries. In addition, the zero preferential rate of duty which applied to the non-sensitive agricultural products, namely "carnations" was withdrawn and a new preferential rate was established at 70 per cent of the current MFN rate of duty vis-à-vis one beneficiary country. 2/

3. Some 82 sensitive industrial products other than textiles were affected by the Individual Fixed Free Duty Amount consisting mostly of chemical and petrochemical products, certain leather products, dropped furskins, fibreboard of wood, plywood veneered panels, footwear, glazed ceramic flags, tableware of porcelain, and ceramic, drawn glass, float glass, "rovings", imitation jewellery, certain iron and steel products, aluminium wire, certain tools, pumps and compressors, swing machines, automatic data processing, microwave ovens, video-recording, colour television, electric filament, electric capacitors, colour cathode-ray television, diodes, transistors, motor vehicles, clocks, certain furniture, festival/carnival articles, other toys,

and shaving brushes ... Twenty among these last products were also affected by individual tariff ceilings. In addition, 13 other products were affected by individual tariff ceilings. They were: synthetic camphor, lysine, cysterine, cortisone, chloramphenicol, mineral or chemical fertilizers, gelatines, activated carbon, polymers of styrene, statuettes of ceramic, watches, other clocks, furniture other than of wood. Furthermore, six non-sensitive industrial products were also affected by limitations. They were: portland cement, 5, ter-butyl-2.4,6-trinitro ..., other compounds with nitrogen function, 6-hexanelactam, albums for samplers or collections, and bicycles. 3/

4. Elsewhere, 74 textiles and textile products of which 66 items governed by the MFA and 8 products considered as non-MFA were affected by the Fixed Free Duty Amount, Tariff Quotas or by the Individual Tariff Ceilings. 4/

5. Except for "carnations" as noted above, all the above-mentioned products, for the remainder of the year, had normal MFN rates re-established for import from all beneficiaries (in the case of three agricultural products) and from the single country concerned. It should be noted that in the case of certain products considered highly sensitive, for which tariff quotas or Fixed Free Duty Amount were set up for half year, the MFN rates were re-established for the corresponding remaining half-year.

6. The limitations were applied as follows: all beneficiaries (3 products); China (102 products); Republic of Korea (55 products); Thailand (48 products); former Czechoslovakia (43 products); India (33 products); Indonesia (32 products); Pakistan (29 products); Poland (28 products); Brazil (26 products); Hungary (23 products); Romania (20 products); Bulgaria (18 products); Malaysia (15 products); Hong Kong (14 products); Philippines (9 products); Singapore (5 products); Mexico (4 products); Macao (2 products); Argentina, Columbia, Libyan Arab Jamahiriya, Saudi Arabia, Sri Lanka and Venezuela (1 product each). This list of countries takes into account re-establishment of MFN rates vis-à-vis products affected by limitations when imported from former Czechoslovakia, Hungary and Poland for the entire year 1992, even though they ceased to be beneficiaries under the EEC scheme as from 1 March 1992. From this date, they signed bilateral interim trade agreements with EEC and these agreements are administered, obviously, outside the EEC GSP scheme.

7. Various Official Journals of the European Communities, series C, of 1992 have provided information on preferential trade which reached tariff ceilings vis-à-vis specific beneficiaries but information on whether or not MFN rates were re-established was not provided. This was in the case of 50 industrial products affecting 26 beneficiaries and 87 textiles and textile products of which 79 MFA products affecting 22 beneficiaries. 5/

8. Further details of imports which reached tariff quotas/ceilings or fixed free (or reduced) duty amount in 1992 may be found in the attached tables.
